

Content Strategy for SEO

Topic clusters, helpful content, E-E-A-T and editorial planning

Topic clusters

- One pillar per broad topic.
- Clusters answer specific questions.
- Every cluster links back to the pillar and vice versa.

Making content better than what ranks

- Fresher and more accurate.
- Answers the follow-up questions.
- Includes something only you can provide.

Editorial calendar and content refresh

- Plan by topic cluster, not by random keyword.
- Schedule regular refreshes.
- Track results per page in Search Console.

Helpful content and E-E-A-T

- Write for a specific reader, not for a keyword.
- Add first-hand experience and evidence.
- Show who wrote it and why they are qualified.

AI-assisted content

- Use AI as an assistant, not an author.
- Fact-check every claim.
- Avoid mass-producing thin pages.

Sample topic cluster

Page type	Title	Target intent
Pillar	Accepting Mobile Money on Your Website: The Complete Guide	Informational / commercial
Cluster	Mobile Money Payment Gateway Fees in Uganda Compared	Commercial investigation
Cluster	How to Add MTN MoMo Checkout to WooCommerce	Informational (how-to)
Cluster	Keeping Customer Payment Data Secure	Informational

E-E-A-T in practice

Signal	How to show it
Experience	First-hand photos, case studies, real results
Expertise	Accurate detail, named author with credentials
Authoritativeness	Mentions and links from respected sites
Trust	Contact details, sources cited, content kept current

Remember

- Plan content in clusters so every page has a job and a link path.
- Helpful, first-hand, trustworthy content is what Google's systems reward.
- Refreshing existing pages is often faster than publishing new ones.
