Document skeleton

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="utf-8">
  <meta name="viewport" content="width=device-width, initial-scale=1">
  <title>Unique, descriptive page title</title>
</head>
<body> ... </body>
</html>
```

Semantic layout elements

Element	Meaning
header	Intro content or navigation for the page or a section
nav	Major block of navigation links
main	The primary content. One per page
article	Self-contained content that could stand alone
section	Thematic group of content, normally with a heading
aside	Related but separate content, such as a sidebar
footer	Closing information for the page or a section
figure / figcaption	Media with a caption

Common elements and attributes

Need	Use
Link to a page	<code>Text</code>
Open in a new tab safely	<code>target="_blank" rel="noopener"</code>
Image	<code></code>
Decorative image	<code>alt=""</code>
Bullet / numbered list	<code> / </code> with <code></code> items
Emphasis / importance	<code> / </code>
Button that acts	<code><button type="button"></code>
Jump within a page	<code>href="#id"</code> and a matching <code>id</code>

Form controls

input type	Purpose	input type	Purpose
text	Single-line text	checkbox	On/off, or many choices
email	Email address	radio	One choice from a group
password	Hidden text	date	Date picker
number	Numeric value	file	File upload
tel	Phone number	url	Web address

Attribute	Effect
required	Field must be filled before submit
minlength maxlength	Character count limits
min max step	Numeric and date limits
pattern="regex"	Value must match the expression
name	Key sent to the server. No name means not submitted

Attribute	Effect
<code>autocomplete</code>	Hints for browser autofill, such as <code>name</code> or <code>email</code>

Table skeleton

```
<table>
  <caption>Title</caption>
  <thead><tr><th scope="col">Heading</th></tr></thead>
  <tbody><tr><td>Cell</td></tr></tbody>
</table>
```

Accessibility checklist

- One `<h1>`, headings in order, never chosen for size.
- Every meaningful image has `alt`. Every control has a `<label>`.
- Everything usable by keyboard. Use `<button>` and `<a>`, not clickable `<div>`s.
- `lang` on `<html>`, unique `<title>` per page, contrast of at least 4.5:1 for body text.
- Validate markup at validator.w3.org and audit with Lighthouse.
